

Natural Firelighters from Ford Logs

WS 239

Directions:

Simply place one firebug beneath well dried kindling and light.

Keep out of reach of children and pets

Store in this box, in a dry place, away from your fireside.

For more information about our products, visit www.fordlogs.co.uk

Firebug firelighters are odourless and guarantee a reliable, long burn. They are made from wood and wool with a wax coating and are hand-made in the UK. They are perfect for wood burners, open fires, BBQs and camping.

For best results use with Ford Logs Woodsure accredited kiln dried logs and kindling. Our logs are barn stored after drying, to maintain between 10 and 20% moisture and are strictly quality controlled. We only supply the best quality, slow growing, hardwood species producing more heat and far less pollution than air dried logs.
